CAREER OBJECTIVE

Motivated Computer Science and Information Technology student seeking software, AI, or frontend development internship opportunities. Interested in building practical applications, improving problem-solving skills, and contributing to real-world projects using modern technologies.

KEY SKILLS

- **Communication Skills:** Good communication and English proficiency
- **Programming:** Java, Python, JavaScript, HTML, CSS
- **Frontend:** React.js, Vite, Bootstrap, Responsive Web Design
- **Backend:** Node.js, Express.js
- **Database:** MySQL, MongoDB
- **Tools:** Git, GitHub, Visual Studio Code
- **Core Concepts:** Object-Oriented Programming, DBMS, Data Structures, Computer Networks

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science and Information Technology
CGPA: 8.2

PROJECTS

Student Wellness Tracker

- Developed a wellness tracking web application that records sleep, study time, screen time, exercise, mood, and stress. Implemented a React/Vite frontend, Node.js/Express backend, wellness score calculation, history tracking, and MongoDB integration.

Medicine Tracker

- Built a practical medicine-tracking application concept for organizing medicines and supporting timely medication reminders and tracking.

Automatic Question Paper Generator

- Created a web-based question paper generation project using HTML, CSS, JavaScript, React, Node.js, Python, and MySQL.

STRENGTHS

- Good communication and teamwork
- Strong willingness to learn new technologies
- Problem-solving and logical thinking
- Adaptability and time management
